

APICS Principles Distribution Requirements Planning

Puget Sound Chapter

Distribution Requirements Planning (DRP) applies concepts necessary for the effective management and control of the distribution channel. DRP introduces the use of materials requirement planning type logic to manage supply chain replenishment.

Through discussion and practical, hands-on exercises, this seminar will help attendees gain a firm understanding of the principles and functions of Distribution Requirements Planning, including re-supply management, performance policies and measurements.

Supply Chains Never Stop Advancing – Neither Should You

Attend this seminar and learn about:

- **Understanding** distribution channel dependencies
- **Detail** understanding of “push”, “pull”, reorder point or DRP for replenishment
- **Exploring** time phasing, the heart of DRP
- **Understanding** the DRP Planning Grid
- **Calculating** projected available balance and net replenishment
- **Exploring** DRP and the Bill of Distribution (BOD)
- **Developing** a warehouse capacity plan

Remote Workshop - Join us with ZOOM!

By the conclusion of the seminar, attendees will have acquired practical tools to applying Distribution Requirement Planning to a business system, and creating warehouse capacity planning.
